EXPERIENCE

Full Stack Developer Intern

Brancosoft

Apr 2025 – Jul 2025

Noida, UP

- Optimized **10+ REST APIs** using Redis caching and query tuning, reducing backend latency by **30%**.
- Engineered scalable data pipelines processing **10,000+ records/day** using asynchronous workers and queue-driven architecture.
- Designed and optimized **MongoDB and PostgreSQL** schemas with indexing strategies for high-performance data retrieval.
- Collaborated on backend system design and API architecture, improving scalability and maintainability in an Agile environment.

Web Developer Intern

SkillCraft Tech

Aug 2024 – Oct 2024

Remote

- Developed responsive and reusable UI components using React.js and Tailwind CSS across multiple device sizes.
- Implemented secure **JWT-based authentication and session management**, improving application security.
- Enhanced frontend performance by optimizing assets and rendering strategies, reducing FCP by **1.5 seconds**.

SKILLS

Languages: JavaScript, Python, SQL
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Frontend: React.js, Next.js, Tailwind CSS
Databases: PostgreSQL, MongoDB, MySQL
Tools & Systems: Redis, BullMQ, Prisma ORM, Docker, Git, CI/CD, GitHub Actions, Selenium

PROJECTS

CVMorph | AI-Powered Resume Optimization Platform

github.com/naman8586/CVMorph

- Engineered a dual-AI inference pipeline (Gemini + Groq) to parse and transform unstructured resumes into structured, ATS-optimized formats.
- Designed a constraint-based AI workflow ensuring zero hallucination while enhancing existing experience and keyword alignment.
- Built schema-driven resume versioning system to generate multiple job-targeted resumes from a single source of truth.
- Automated LaTeX-style PDF generation using Puppeteer for consistent, recruiter-friendly and ATS-compliant outputs.

GitIntel | Real-time GitHub Analytics Platform

github.com/naman8586/gitIntel

- Engineered a real-time event-driven analytics system using GitHub Webhooks, Redis, and BullMQ to process high-volume repository activity.
- Designed scalable background job pipelines for PR events, push events, and contributor tracking with asynchronous processing.
- Modeled optimized PostgreSQL schemas using Prisma ORM for efficient aggregation of merge rates, contribution scores, and activity metrics.
- Built intelligent scoring algorithms to rank contributors based on PR impact, merge success, and review activity.

Scrappery | Scalable Web Scraping Platform

github.com/naman8586/Scrappery

- Built a distributed web scraping platform using Next.js and Python to extract data from dynamic, JavaScript-heavy websites.
- Designed asynchronous worker pipelines to process **10,000+ records**, improving throughput by **40%**.
- Implemented job orchestration system with real-time progress tracking, failure handling, and retry mechanisms.

EDUCATION

Bachelor of Technology in Information Technology

Dr. Akhilesh Das Gupta Institute of Technology & Management

2022 – 2026

CGPA: 8.0/10.0
